

# THE SHRINKING LANDFILL

Did you know that kids in Japan and western Europe throw away less trash than kids in the United States?

When our Bluff Road Landfill is full in 2026, it will be the largest man-made structure in Lancaster County. It will be 170 acres in size and rise to a height of 150 feet.

You can help shrink the landfill by not throwing away as much stuff. You can make two choices within each circle in the maze. Make a good choice, and you'll see the landfill shrink. Make the wrong choice, and you'll dead-end in a trash pile when you exit each circle.

The average person in the U.S. throws away about 4.5 pounds of trash each day.

The amount of paper that gets trashed every year could build a 12-foot-high wall that stretches across the United States from coast to coast.

You've made the right choices, reduced waste and helped to shrink the landfill.  
**CONGRATULATIONS!**
